4Q review; benefit of being non-Chinese solar firm to rise

- OCI Holdings reported 4Q sales of KRW810.6b (-4% q-q) and operating profit of KRW27.3b (+KRW80.7b q-q) thanks to: 1) its solar-grade polysilicon business turning profitable; and 2) successful presale at DCRE.
- Tesla and SpaceX's entry into the solar business is a positive development for OCI Holdings (a non-Chinese polysilicon producer) as the moves should expand the firm's addressable market and provide a potential boost to its share price.
- The holding company should enjoy remarkable improvements in its fundamentals this year, backed by a turnaround in the solar-grade polysilicon business, new wafer production, and a recovery in subsidiary OCI's operating results.

WHAT'S THE STORY?

4Q review—Earnings turning around: OCI Holdings reported 4Q sales of KRW810.6b (-4% q-q) and operating profit of KRW27.3b (+KRW80.7b q-q), for an operating margin of 3.4% (up 9.7%pts q-q), marking a return to profitability after three quarters of losses.

- **OCI TerraSus**, which operates a solar-grade polysilicon business in Malaysia, recorded sales of KRW145b (+10% q-q) and operating profit of KRW33b (+KRW97.7b q-q) thanks to stable demand from US clients (ie, increasing sales volume) and normalization of production, which drove up operating margin by 71.9%pts q-q to +22.8%.

- **OCI Enterprises** logged sales of KRW36b (-41% q-q) and an operating loss of KRW16b (widening KRW28.6b q-q). While losses at US module subsidiary (MSE) diminished q-q, OCI Energy turned to a loss on a high base (from having recognized the sale of a project in 3Q25).
- **OCI SE** reported sales of KRW51b (-30% q-q) and an operating loss of KRW12b (widening KRW14.2b q-q), impacted by unplanned maintenance (ie, reduced operating days), lower REC sales volume, and a decline in SMP.
- Sales and operating profit at **DCRE** came in at KRW110b and KRW12b (+4% and +KRW18.8b q-q) thanks to ongoing construction of the City OCIEL 6 and 7 blocks in Michuhol District (Incheon) and the beginning of construction of the City OCIEL 8 block.
- Meanwhile, **OCI**'s sales and operating profit came in at KRW467.3b (-2% q-q) and KRW2.8b (+KRW13.2b q-q), respectively, with a q-q return to profitability based on increased semiconductor material sales and the recognition of pitch carry-over quantity.

Musk's solar business expansion—Positive for domestic solar industry: Over the past two months, Elon Musk has mentioned plans to expand or enter the solar business through Tesla and SpaceX. This has been the main driving force behind the rallies of solar equipment and materials stocks both at home and abroad. We believe these developments will have positive implications for Korean solar companies from both a fundamental and momentum perspective. Tesla's Solar Roof and Solar Module products are based on silicon-based solar panels, and the US company is not currently integrated upstream (polysilicon and wafers). Even if Tesla expands production to 100 GW, it appears unlikely to integrate upstream, which could benefit non-Chinese upstream suppliers (polysilicon, wafers, and potentially cells if Tesla does not manufacture them). SpaceX is expected to use a mix of silicon and perovskite solar panels until 2026, before adopting a primary product in 2027. In the short term, this approach should provide a positive momentum for the solar market as a whole.

View—Demand for non-Chinese solar materials to increase: The US administration is now conducting a Section 232 investigation into solar-grade polysilicon and its derivatives, with results expected to be announced in 1H26. This could lead to stronger demand for non-Chinese polysilicon in the US, benefiting non-Chinese material suppliers. OCI Holdings is well-positioned to capitalize on this trend via higher utilization rates at its Malaysian polysilicon plant, production of new non-Chinese wafers, and an earnings turnaround at subsidiary OCI.
