Vitzrocell (082920)

Battery-mix improvements with defense upside

- Vitzrocell's operating margin hit an all-time high last year thanks to high-temperature battery-mix improvements.
- The stock has climbed 44% mtd, reflecting growing investor confidence in defense-related demand following the start of the Iran conflict.
- High-temperature batteries should be the primary driver of the firm's earnings momentum in 2026.

WHAT'S THE STORY?

2025 operating margin makes new high of 28% on high-temperature battery-mix improvements: Vitzrocell delivered record operating results in 2025, with sales of KRW243.1b (up 15%) and an operating profit of KRW69.3b (up 33%). This exceptional profitability stemmed from product-mix improvements (centering on lucrative high-temperature batteries). Its operating margin hit a record 28%. By category, bobbin-type batteries, used primarily in smart meters and accounting for the largest share of its sales, grew just 5%. In contrast, high-temperature batteries for the oil and gas industry surged 52% on the recognition of earnings at Innova Power Solutions (acquired in Oct 2025) from 4Q25.

Shares up 44% mtd on rising expectations towards military battery demand amid Iran war: Following the outbreak of the conflict with Iran, investors have begun to view Vitzrocell as a potential beneficiary—it supplies primary batteries for missile systems and other defense applications.

Source: Company data, Samsung Securities estimates

Although military-grade battery sales—covering wound-type, ampule-type, and thermal batteries—accounted for 25% of the firm's 2025 sales (vs 24% in 2024), the lengthening of the conflict with Iran has heightened expectations of future US defense contracts. The US military battery market remains dominated by established US suppliers like EaglePicher, and entry into this market requires rigorous certification processes. As a result, analysts believe meaningful market penetration by foreign suppliers remains a long-term prospect rather than an immediate opportunity.

High-temperature batteries to fuel 2026 earnings: The full-year impact of Innova Power Solutions (a Canada-based maker of battery packs for drilling equipment, which Vitzrocell acquired last year) should further boost the high-margin high-temperature battery sales portion in 2026, driving up its earnings momentum. Based on 2026 consensus (KRW288.9b in sales and KRW85b in operating profit; FnGuide), Vitzrocell is trading at an estimated 18.4x forward 2026 P/E.
