## Hallacast (125490)

### 2Q review: Back on growth trajectory

- Hallacast reported 2Q sales of KRW49b (up 35.2% y-y) and an operating profit of KRW3.3b (up 14.9% y-y), both beating consensus. Operating margin bounced back to 6.6%.
- Top-line growth was driven by expansion in autonomous driving and global AI-related sales, while higher utilization rates at newly added production lines helped mitigate raw material cost pressures. Profitability improvement in 2Q is encouraging.
- We expect earnings growth to continue into 2H, supported by the launch of autonomous driving and display automation lines, as well as upcoming shipments of drive unit casings for robots.

### WHAT'S THE STORY?

**2Q review:** Hallacast reported 2Q sales of KRW49b (up 35.2% y-y and 20.9% q-q), and an operating profit of KRW3.3b (up 14.9% y-y and 117.5% q-q), exceeding FnGuide consensus by 11.3% and 35.7%, respectively. Operating margin improved to 6.6% (up 2.9%pts from 3.7% in 1Q). Profitability, which declined in 1Q due to new investments and rising raw material prices, has recovered rapidly alongside sales growth.

- **Achieves 50% of annual guidance:** For 1H, the company recorded sales of KRW89.6b and an operating profit of KRW4.75b, for a margin of 5.3%. Sales in 1H met 50% of annual guidance—the company has been targeting full-year sales of KRW180b with quarterly profitability improvements. The earnings growth is set to continue in 2H, supported by the launch of automation lines for autonomous driving and display modules, as well as upcoming deliveries of drive unit casings for robots.

- **Profitability overcomes raw material pressures:** Profitability fell to 3.7% in 1Q due to new facility investments and rising aluminum prices, but recovered in 2Q despite a continued cost inflation. In 1H, raw material costs as a share of sales rose to 51.4% (from 47.8% in 2025). In 2H, profitability should improve to high single digits, driven by stabilizing raw material prices and higher utilization rates at new facilities.

**Expanding growth domains from autonomous driving to robotics:** Hallacast entered the mobility market in 2016 with orders for connected-display materials. It initially supplied LG Electronics' vehicle component solutions division and later expanded to serve Hyundai Mobis, too. In 2025, it began supplying vision cases and automotive display modules for autonomous vehicles of a global AI company.

- **To supply robotics components from 2H:** In 2H, it should begin delivering drive unit casings for robots. Mass production is scheduled to commence in 3Q on both the autonomous driving and display automation lines, enabling the capex burden from 1H to transition into sales growth in 2H. To meet demand from global AI-driven firms, Hallacast is expanding machining capacity by 100% and die-casting capacity by 30%.
- **Capacity expansion driven by new-business initiatives:** The company plans to broaden its scope from single-part manufacturing to integrated module systems. It has plans to ramp up key automation lines, including a moving-display line (mass-production from 3Q27), an autonomous-driving module line (3Q26), and a display module line (3Q26).

**Order mix shifting rapidly toward future mobility:** While autonomous driving and robotics accounted for a respective 25.1% and 1.3% of cumulative new orders totaling KRW1t over 2022-2025, their shares in the cumulative order backlog as of end-June rose to a respective 31.0% and 3.3%.

- **Order backlog supports 2H growth:** The order backlog as of end-2Q stood at KRW920b, representing six times the 2025 sales level. This reflects rapid growth in direct orders from global AI companies, indicating strong visibility into future sales growth driven primarily by already secured contracts, rather than short-term market conditions.
- **Sustainable annual sales growth of over 15%:** Sales at Hallacast grew at a 2022-2025 CAGR of 15.6%. Guidance puts 2026 sales at KRW180b (up 15% y-y). In 2H, the launch of mass production for autonomous driving and display modules, coupled with robot component deliveries, will fuel simultaneous growth in top line and profitability.
